

Reference number: od-00535/OŘ/18

Prague, 16.2. 2018

Notification to carriers and customers:

ČEPRO, a.s. is to update and centralize data on vehicles that are registered in our warehouses to collect PHL. This measure is necessary in order to increase the safety in the filling of tank trucks (AC) and to meet the requirements of the valid ADR legislation and Act No. 11/1994 Coll. as amended.

As of 22 February 2018 the current practice of registration of new tank trucks into the system and of extension the existing ADR certification of vehicles will therefore be completely terminated. As of this date, it will no longer be possible to update any vehicle carrier data through the warehouse operator as it has been possible so far.

A new web service will be made available in advance to carriers, where the carriers will be able to submit data about their vehicles to the headquarters of ČEPRO, a.s.

As of 19 February 2018 you will find more technical details, instructions for updating the data and information about new method of registration of your vehicles and extension of the validity of the ADR certificate of your existing registered vehicles on the following web address:

<https://www.ceproas.cz/o-nas/informace-pro-verejnost-a-zakazniky>

Thank you and I am looking forward to further cooperation,

ČEPRO, a. s.
Ing. Martin Vojtíšek
Member of the Board
